Finance Data Quality Analyst

Paste job description

12-month Fixed-term contract

Location: Norwich based (50% hybrid working)

Salary: £29,000 - £33,000

Contract type: Permanent

This is a great job for someone who enjoys working with data, spotting patterns, and making sure information is accurate and reliable. This role would suit someone who is curious, detail-focused, and confident working with large datasets or data flows, and who is motivated to improve how data is governed and managed.

Eligibility

● Unclear

- The description does not state an eligibility rule that clearly helps or excludes a 2022 graduate

15-category breakdown

01. Core career-path alignment

● AMBER

Score: 6/12

Reason: The role has some technical overlap (systems, reporting tools), but the core reads more like reporting, issues, queries.

02. Technical systems fit

● AMBER

Score: 4/8

Reason: The role uses technical tools (systems, reporting tools), but the day-to-day delivery looks more like reporting, issues, queries than systems-building work.

03. Barrier to entry

● AMBER

Score: 3/6

Reason: Experience level is unclear.

04. Day-1 usefulness

● GREEN

Score: 6/6

Reason: Green signals: data quality, support.

05. Stakeholder load

● AMBER

Score: 4/8

Reason: Stakeholder exposure looks normal for a collaborative technical role.

06. Ambiguity level

● AMBER

Score: 4/8

Reason: The description does not say much here, so this stays in the middle.

07. Structure / predictability

● AMBER

Score: 3/6

Reason: The description does not say much here, so this stays in the middle.

08. Ramp-up realism

● AMBER

Score: 3/6

Reason: Ramp-up expectations are only partly clear.

09. Internal vs client-facing

● AMBER

Score: 3.5/7

Reason: The description does not say much here, so this stays in the middle.

10. Pressure / operational load

● AMBER

Score: 3.5/7

Reason: The description does not say much here, so this stays in the middle.

11. Work mode / location stability

● GREEN

Score: 4/4

Reason: Green signals: hybrid.

12. Training / support

● AMBER

Score: 2.5/5

Reason: Support level is unclear from the description.

13. Narrative value

● GREEN

Score: 6/6

Reason: Green signals: quality, data quality, systems.

14. Support and working environment fit

● AMBER

Score: 3/6

Reason: The description does not say much here, so this stays in the middle.

15. Stability / progression

● GREEN

Score: 5/5

Reason: Green signals: permanent.
